**Subject:** Re: Cape Fear River Sampling

Hi Andy,

Thank you! I look forward to collecting more samples and will keep you and Mark updated on potential dates.

Best,  
Hillary

Hillary,

I'm very happy to go just about any time you are ready.

One thing to bear in mind is that the Huske Lock and Dam was damaged due to flooding from hurricane Matthew last fall and it was still closed for repairs when Lauren and I went to collect samples last December. I don't know if it is open to the public again.

In any case please let me know how I can help. We can wrangle an EPA truck to support this sampling effort.

Thank you very much,

Andy

**Subject:** Cape Fear River Sampling

Hi Mark and Andy,

I am planning to go collect some samples in the Cape Fear River soon. I know that Mark mentioned the potential to bring a boat out to collect these samples awhile back. Would one or both of you be interested in helping with this? We don't necessarily need a boat, but it may aid in the collection of a sample right by Chemours, as well as upstream of it. Let me know your thoughts, as well as potential days or time frames that would work well for you (if you are able to help, that is). I think collecting the samples sometime within the next month or so would be ideal, but whenever works best for you is the ultimate deciding factor. I know how busy you both are and always appreciate your collaboration. I wanted to start a conversation and see if one or both of you are interested. Thank you!

Best,

Hillary
